

# ARE YOU READY FOR YOUR SLICE OF THE ACTION?

## **New Zealand is gearing up for its biggest event in years and your EFTPOS terminal needs to be ready.**

In September next year, this country will be flooded with more than 71,000 overseas visitors to watch the Rugby World Cup 2011.

While they're here, they'll be spending an estimated \$1.25 billion dollars\*, so if you want to take your slice of the action, you need to be ready.

Technology evolves to make machines faster, smarter, and safer. Your EFTPOS terminal also needs to be upgraded, to keep pace with the latest improvements in the payment field.

We know that most international tourists use chip cards, so we want to make sure your terminal can process their transactions, and that it's compatible with the latest card technology.

Having the right terminal keeps payments secure, reduces the likelihood of credit card fraud, and provides your customers with a reliable payment solution.

### **THE CLOCK IS COUNTING DOWN**

All 5.1 specification EFTPOS terminals need to be upgraded to a 6.0 and be up and running by June 2011, so act sooner rather than later. If you leave it too late, your business could lose out on valuable revenue.

**Check below to see when you need to upgrade.**

<u>Terminal Version</u>	<u>End Date</u>
5.1	1st June 2011

## **ACT NOW: [www.areyouready.co.nz](http://www.areyouready.co.nz)**

To find out whether you're ready, just type in your terminal ID at [www.areyouready.co.nz](http://www.areyouready.co.nz) or talk to your EFTPOS provider. And don't forget, if you're signing a new lease, make sure you've got the most up-to-date terminal.
