

# Help the people of Christchurch stay connected

We need you to bring in your old corded home phones. Due to numerous homes being without power we need to get as many of these home phones as possible.

Corded phones plug straight into the jack-point and work even when there is no power on.

Take them to any Telecom store during retail opening hours and we will get them down to Christchurch.

Your help will allow people to stay connected with loved ones during this sad time.

For more information visit [telecom.co.nz](http://telecom.co.nz)

Thank you

## If you have friends and family in Christchurch and are in contact with them you can let them know:

Telecom payphones are free for local, national and mobile calls.

Keep mobile use for emergency calls only or to confirm the safety of friends and family. Keep calls brief or text where possible.

And if they can't get to their home or work, they can call Telecom on 120 for residential customers or 125 for business customers and we'll divert their number to another Telecom number for free.
